

Comprehensive Care Treatment Planning Flowchart

Sanitative Therapy (throughout)

- scaling, root planing, curettage, OHI
- mechanical debridement
- open flap curettage
 - debride infrabony pockets
 - explore topography of questionable teeth
 - debride fresh extraction sockets
 - chemotherapeutic tx

Primary Focus

- deep caries
- occlusal trauma or myofascial pain syndrome
- extraction of hopeless teeth
- prosthetic and operative repair

Maintenance and Reassessment

Prosthetic Phase

- fixed prosthesis
- fixed-removable prosthesis
- implant assisted
 - fixed prosthesis
 - fixed-removable prosthesis
- implant supported
 - fixed prosthesis
 - fixed-removable prosthesis

Transitional Phase

- transepithelial healing for 2nd stage implants
- allow for soft tissue maturation
- selection of implant abutments
- conversion of provisional to
 - implant assisted supported restoration
- re-evaluation
 - stability of fixtures and remaining teeth
 - occlusal vertical dimension
 - aesthetics, phonetics
 - emergence profiles
 - final prognosis determination

Periodontic Considerations

- osseous therapy
 - regeneration - augmentation
 - ostectomy - osteoplasty
- mucogingival management
 - autogenous gingival grafts
 - subepithelial CT grafts
 - apically positioned gingival complex
- onlay grafting
- sinus elevation
- fabrication of surgical template
- implant installation
 - healed extraction sites
 - fresh extraction sites
 - bone graft, GTR, GTAM

Endodontic Considerations

- interceptive tx
- conventional tx
 - symptomatic teeth
 - dystrophic calcifications
- fractured roots
- retreatment
 - separated instruments
 - apical and periradicular lesions
- microsurgical treatment

Operative Considerations

- restoration
- conservative control of caries
- fabrication of provisional restorations
 - replace missing teeth
 - maintain inter-intra arch harmony
 - assess adequacy of tooth reduction
 - determine clinical crown profiles
 - develop therapeutic occlusal scheme
 - control occlusal forces
 - assess function
 - diagnostic template
 - markers for radiographic analysis

Orthodontic Considerations

- corrective
 - level and align teeth
- erupt fractured or impacted teeth
- periodontal regeneration
 - extrude teeth to level infrabony defects
 - extrude teeth to augment residual ridge
- orthognathic surgery

Sanitative Therapy (throughout)

- scaling, root planing, curettage, OHI
- mechanical debridement
- open flap curettage
 - debride infrabony pockets
 - explore topography of questionable teeth
 - debride fresh extraction sockets
 - chemotherapeutic tx
