Visual Endodontics Curriculum Programmed by Markus Haapasalo, Unni Endal, and Shimon Friedman

This dynamic, interactive multimedia program, the product of longstanding cooperation among international specialists in endodontics and related fields, serves as a portal of entry into the fascinating world of modern endodontics. Eleven modules of information are seamlessly integrated via an intuitive, user-friendly interface that allows even computer novices to navigate quickly and easily throughout the program. In turn, each module is itself divided into key topics that contain clinical activities and theoretical concepts, all organized within a hierarchical structure that enables users to monitor their own location within the program at all times. Combining more than 2,400 superb-quality pictures, 1,400 instructional icons, and 26 digital video clips, as well as a self-assessment tool, a lecture/presentation editor, and much more, this CD-ROM program is a powerful learning and teaching tool for any dentist or dental student with even a passing interest in endodontics.

Module Topics:

Morphology; Instruments; Diagnostic Procedures; Cases; Etiology; Epidemiology; Materials; Therapy; Complications; Emergencies; Traumatology

Platforms: PC and Macintosh £177/€248 + VAT; Student Price £141/€198 + VAT Available February 2006
